

Wrecks and History of Calabria 2025

GUE PROJECT BRIEF - 2025

The aim of this tech diving week was to combine fun diving with documenting local shipwrecks and discovering the rich history of the Calabria region. For some of the participants, these were the very first technical dives after finishing their GUE Tech1 training. We managed to produce some photogrammetry models, cleanup some ghost nets and definitely have a lot of fun.

During the expedition we dived on the following spots:

23.06.2025 : Wreck of Capitan Antonio (2-12m)
24.06.2025 : Pasubio wreck (35-42m)
25.06.2025 : Cosala wreck (35-45m)
26.06.2025 : Scilla Reef (0-60m)
27.06.2025 : Valfiorita wreck (40-60m)
28.06.2025 : Pasubio wreck (35-42m)

During the dives we were able to :

Collect video documentation of all visited places;
Make a 3D model of the bow part of the Capitan Antonio wreck;
Make a 3D model of the stern part of the Capitan Antonio wreck;
Make a 3D model of the cannon and parts of the aft deck on the wreck of Cosala;
Remove ghost nets from the anchor and stern of the wreck of Pasubio;

Project Team:

Isadora Abuter Grebe,
Dinas Aalders,
Keith Andrews,
Dirk Van Daalen,
Lara Indra,
Piotr Nowak,
Bartek Trzcinski,
Grzegorz Werstler,
Joanna Ziolo-Werstler,
Alma Wojciechowska.

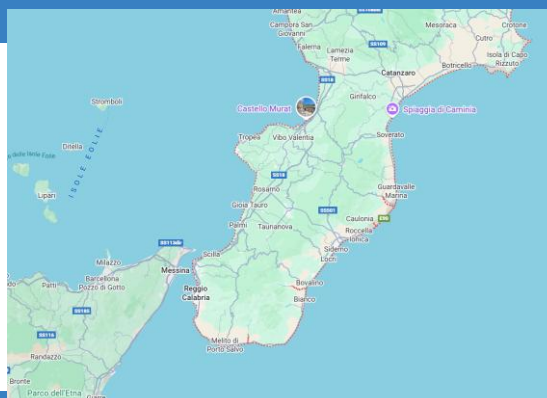

HOW TO BE PART OF THIS PROJECT

Reach out to Bartek – we are planning to organize regular wreck documentation projects in Calabria.
